

FLSMIDTH BUFFALO

FLSmidth Buffalo is a world class supplier of feeding and crushing equipment for mining and general industries.

We offer extensive experience in design, development, manufacture, and servicing of this equipment.

Located in Witbank, South Africa, the company began operations under the name of McCarthy Mine Machinery in 1975 as a service to the South African Mining Industry.

The name changed to FLSmidth Buffalo when we joined the FLSmidth group in 1999. Today, our equipment is still manufactured in South Africa utilizing the latest equipment technology, resources, and materials.
